Haitham Kallab

Full Stack Developer | Building Scalable Web & Mobile Solutions

SUMMARY

Front-End Developer specialized in digitizing administrative workflows and real estate services. I developed a comprehensive management system for a transaction bureau, automating complex external requests such as Title Deeds, Chain of Title, and Land Registry Statements. The platform features an automated real-time tracking system using Property IDs to enhance transparency and user experience. Committed to delivering high-performance, secure, and scalable solutions ahead of schedule.

WORK EXPERIENCE IN COMPANIES

Full-Stack Developer (Freelance) | Oct 2025 – Apr 2026

- End-to-End System Development: Engineered a comprehensive digital ecosystem, including a high-performance web platform and a cross-platform Android application using React Native.
- Workflow Automation: Automated complex transaction processes for real estate services, enabling digital requests for Title Deeds and Land Registry Statements.
- Real-Time Tracking Engine: Developed an integrated tracking system that allows clients to monitor transaction progress via Property ID, enhancing transparency and trust.
- Backend & Database Management: Deployed and managed server-side infrastructure on PythonAnywhere utilizing SQLite for reliable data storage and efficient processing.
- Scalability & Security: Implemented advanced server-side protection and a modular code structure, ensuring the system is secure and ready for future feature expansions.

Software Maintenance Specialist | Sham Tel | 2021 – 2022

- Systems Troubleshooting: Diagnosed and resolved complex software failures within Android and Windows operating systems, ensuring optimal device performance and stability.
- Advanced Security Decryption: Executed specialized procedures for bypassing security locks and encryption protocols, including FRP (Factory Reset Protection) bypass and device unlocking.
- Data Recovery Specialist: Successfully recovered critical data from locked or corrupted devices, utilizing advanced software tools while maintaining strict data integrity.
- System Optimization & Repair: Handled intricate system flashing and OS reconfiguration tasks to resolve deep-seated software glitches and firmware issues.

Personal Project

Full-Stack E-commerce Platform (Gaming & Tech) | 2026

- Comprehensive E-commerce Architecture: Developed a full-scale online store dedicated to high-end gaming hardware, including PCs, laptops, GPUs, CPUs, and RAM modules.
- Advanced Product Comparison Engine: Engineered a specialized feature allowing users to compare technical specifications across multiple hardware components to facilitate informed purchasing decisions.
- Dynamic Inventory Categorization: Built a sophisticated database structure to manage diverse product categories and complex technical attributes, ensuring precise filtering and search results.
- Performance-Driven UI/UX: Designed a modern, responsive interface tailored for the gaming community, focusing on high-speed navigation and seamless user flow across hundreds of SKUs

RESEARCH & PROJECTS

Research Project | Innovative Automotive E-Commerce Platform | 2024

- Market Transformation: Engineered a high-graded research project focused on digitizing the automotive marketplace, eliminating traditional brokerage fees to provide a zero-commission, peer-to-peer trading environment.
- Immersive 3D Experience: Integrated advanced 3D car visualization using Three.js and React Three Fiber, allowing users to interact with realistic car models directly within the browser for an enhanced digital showroom experience.
- Strategic Monetization: Designed a balanced revenue model via Google Ads, implementing a "User-First" ad density policy (capped at 2 ads per session) to ensure sustainable platform income without compromising user experience.
- Advanced Tech Stack: * Next.js & Tailwind CSS: Leveraged for superior SEO performance, lightning-fast load times, and a sleek, fully responsive interface.
- Framer Motion: Utilized for high-end UI animations and smooth transitions, creating a premium feel.
- Three.js: Empowered the platform with interactive 3D rendering capabilities.

SKILLS

- Frontend: HTML, CSS, JavaScript, TypeScript, React.js, Next.js
- Styling: Bootstrap, Tailwind CSS
- Programming: Java, C++,Python,Dart
- Tools: Microsoft Office, Microsoft Project
- Other: Project Management, Data Analysis, Technical Support

EDUCATION

Tishreen University | Faculty of Applied Sciences

Bachelor's Degree in Computer Techniques Engineering

2020 - 2025

Lattakia, Syria

LANGUAGES

Arabic: Native

English: Pre-Intermediate (B1)

German: Basic (A1)
